Foreword

Dear Ladies and Gentlemen,
Dear friends and partners of the
European Commodity Exchange,

Welcome to the 66th European Commodity Exchange, which will take place in Rotterdam at the beginning of November this year.

Rotterdam stands for trade, change and international networking like hardly any other city in Europe. As one of the most important ports in Europe, the city connects markets, people and regions across borders. This makes Rotterdam a special and at the same time suitable place for our meeting.

The European Commodity Exchange has been the most important meeting place for the European agricultural and raw materials industry for many years. It offers space for personal exchange, new perspectives and dialogue about developments that move our industry. Especially in times of increasing changes in the markets, geopolitical challenges and new requirements for sustainability and security of supply, direct exchange between market participants is becoming increasingly important.

We look forward to cultivating existing partnerships in Rotterdam, making new contacts and talking together about our markets and expected developments.

Christian Plössl,
President of the European
Commodity Exchange in Strasbourg

I wish all visitors, sponsors and partners and the entire team around Jan Willem Baas and Caroline Emmen from the 'Royal Dutch Grain and Feed Trade Association' a successful and inspiring European Commodity Exchange, interesting discussions and many personal encounters that will last beyond the event.

Welcome to Rotterdam!

Christian Plössl

Dear guests,

Welcome to the European Commodities Exchange in Rotterdam.

As chair of the Royal Dutch Grain and Feed Trade Association, Het Comité, my colleagues and I are delighted to welcome you to the 66th European Commodities Exchange. For those of you who remember the previous time we organized an ECE in 2011, it is an honour to have you back in the Netherlands.
We will promise you a well organized and inspiring event with a Dutch touch again, partly thanks to the several sponsoring partners.

For the exchange you will be welcomed at Rotterdam Ahoy, one of the most versatile and modern event venues in the Netherlands. It offers 10,000 m2 space and a large amount of exhibitors for your meetings and valuable new contacts. A special highlight of the ECE is the galadiner that takes place in the iconic Laurenskerk, one of Rotterdam's most beautiful monuments in the city center. Do note that both AHOY and the Laurenskerk are very easy accessible by public transport, which we promote with free tickets for the participants.

Jan Willem Baas
Chair of the Royal Dutch
Grain and Feed Trade Association

We as a team and sponsors are convinced that the 66th edition of the ECE in Rotterdam promises to be an unforgettable one for you as participant.

See you in Rotterdam!

Jan Willem Baas

Dear guests,

More than two years ago we were asked to join the Advisory Committee of the ECE Rotterdam 2026. To contribute ideas and think along the main outlines of what should be a high-quality and inspiring event for the grain and animal feed industry. Beside our professional interest in the sector of course the choice of Rotterdam as international port city made it easy to accept the invitation. In these years we closely followed the preparations of the ECE Rotterdam 2026 team for this import event. With proud and full of confidence we are looking forward to a well organized and unique ECE Rotterdam 2026.

See you all in Rotterdam!

Photo: Dennis Schenk (Peterson-Control Union), Matthijs van Doorn (Havenbedrijf Rotterdam), Daan Vriens (Cefetra), Paul Stam (Bunge), Harry v.d. Avoort (Cofco).

With proud and full of confidence we are looking forward to a well organized and unique ECE Rotterdam 2026.

AGRON TARIM

Agron Tarım is an experienced company in the trading of grains and feed raw materials, with more than two decades of industry experience since its establishment in 2001. Through its reliable supply network, strong business partnerships, and commitment to product quality, the company has built a solid position in the international agricultural commodities market.

Agron Tarım specializes in the sourcing and trading of a broad range of agricultural commodities, including grains such as corn, barley, and wheat, as well as feed materials such as soybean meal, canola meal, soybeans, sunflower meal, DDGS, corn gluten feed, sugar beet pulp, and molasses.

Supported by an extensive supply chain and international business partnerships, Agron Tarım provides the food and feed industries with high-quality agricultural commodities under competitive and reliable commercial conditions. The company places particular emphasis on continuity of supply, transparency, and the development of long-term relationships with its customers and business partners.

Since 2024, Agron Tarım has operated as part of Ofis Holding, combining its long-standing industry experience with the Holding's corporate structure and vision. With a focus on reliable, sustainable, and consistent supply, Agron Tarım continues to strengthen its role in the global grain and feed raw materials trade while contributing to the development of Türkiye's food and feed industries.

BTG Pactual Commodities

BTG Pactual Commodities is among the largest agricultural commodity trading companies in Brazil. Operating from north to south of the country, we oversee every stage of the physical business — from origination to delivery — trading soybeans, soybean meal and oil, corn, sugar, ethanol, fertilizers, and cotton to destinations across multiple continents. We provide comprehensive support to producers, including barter financing, logistics services, and price-fixing/hedging strategies.

Our footprint is anchored by the ***origination of 15 million tons of all products across Brazil*,*** complemented by our* ***Paranaguá terminal****, with 170 K MT of static storage capacity and* ***4 million tons handled per year****, scaling to 270 K MT of static capacity and* ***up to 10 million tons in a private berth*** within the next three years. This physical strength reinforces Brazil's leadership in global agribusiness and is backed by ***BTG Pactual, the largest Investment Bank in Latin America*** — giving our partners the agility of a trading house combined with the impact and excellence of a fully integrated financial institution.

Cefetra Group is a global supplier of agricultural ingredients, serving the animal nutrition, food ingredient and energy industries. With more than 125 years of experience in agricultural trade, we source, trade and distribute over 250 products globally. Our agricultural portfolio ranges from grains, proteins and co-products to oils, pulses, specialist crops and organic raw materials.

Our agricultural companies combine local market knowledge, strong origination networks, product expertise and international logistics. Together, they serve different market needs - from large-volume commodity flows and crop contracts to niche products, while also creating value from agricultural by-products.

The network comprises Cefetra, Cefetra Feed Service, Cefetra Benelux, Tracomex, Thenergy, BioCore, Cefetra Ltd, Premium Crops, Cefetra Polska, Cefetra Ibérica and Cefetra SpA.

This network is complemented by our specialist brands and services: Ceras Analytics, Certified Responsible Soya, Crop Marketing Groups and Cefetra Ecosystem Services. They add further expertise in market intelligence, sourcing programmes and support for farmers and supply-chain partners.

Cereal Docks Spa

Booth No.
B.4

Cereal Docks is an Italian industrial group specialising in the primary processing of agricultural raw materials, with a particular focus on oilseeds and cereals. Founded in 1983 as a family-run business, the Group has grown to become one of Europe's leading players, connecting farmers and international supply chains with the food, feed, pet food, pharmaceutical, cosmetics and industrial sectors.

Cereal Docks processes soya, sunflower, rapeseed, maize and other plant-based raw materials into high-quality ingredients, including flours, oils, lecithins and cereals. Thanks to an integrated industrial and logistics network, the Group processes over 3 million tonnes of cereals and oilseeds annually, combining production expertise, quality, traceability and supply chain efficiency.

Innovation and sustainability are at the heart of Cereal Docks' development. As a Benefit Corporation since 2021, the Group is committed to creating shared value for people, communities, agriculture and the environment, by constantly investing in advanced technologies, renewable energy, the circular economy and innovative plant-based ingredients.

Cereal Docks - Ingredients for change, transforming the present to sustain the future.

ChemOil Logistics AG

Switzerland's largest rail logistics provider for dangerous goods

ChemOil was founded in 1999 and is a subsidiary of SBB Cargo. The company forms part of a closely-knit European logistics network and primarily provides innovative, high-quality services to customers in the chemical and petroleum industries. ChemOil's core competence lies in the organisation and handling of door-to-door freight transport, utilising all available modes of transport.

Where are your innovative, Europe-wide logistics partner for the chemical, petroleum and agrar sectors. As Switzerland's largest provider of bespoke end-to-end solutions for the transport of dangerous goods, we possess in-depth, practical expertise. If, like our renowned clients, you too wish to optimise efficiency, flexibility and safety within your transport chain, then you've come to the right place.

In addition to the chemicals and oil sectors, we also offer block train services for agar and general merchandise, as well as single-wagon transport via our own ChemLink system. If required, we also hire out the necessary railway wagons, tailored to our customers' needs and requirements.

ChemOil Logistics maintains a transparent and fact-based information policy. Should you have any questions regarding ChemOil Logistics, please do not hesitate to contact us.

CISS GROUP Netherlands B.V.

CISS GROUP - International Inspection, Testing & Certification
CISS GROUP is an international group of companies providing independent cargo inspection, laboratory testing, certification, and chartering services to commodity traders, producers, exporters, importers, and other participants in global supply chains. Headquartered in Singapore, CISS GROUP operates through an international network of offices and representatives, including our established office in Rotterdam - one of Europe's key commodity trading and logistics hubs. Our Rotterdam office provides European clients with responsive local support backed by the expertise and resources of our global network.

We specialize in the inspection and quality control of grains, oilseeds, vegetable oils, meals and feed products, fertilizers, metals and minerals, industrial commodities, and FMCG products. Our services include cargo condition and quantity control, sampling, laboratory testing, loading and discharge supervision, draught surveys, vessel hold and container cleanliness inspections, stock monitoring, sealing, and detailed photo and video reporting. Professional laboratory testing and independent inspection help verify contractual specifications and minimize quality, quantity, and operational risks. Upon completion, CISS GROUP issues Quality and Quantity Certificates and inspection reports, supported by secure digital verification and QR-code authentication.
Combining local expertise in Rotterdam with global operational coverage, CISS GROUP provides reliable independent control throughout the supply chain, helping clients ensure transparency, reduce trade risks, and conduct international commodity transactions with confidence. ***CISS GROUP - Survey. Testing. Certified.***

Copenhagen Merchants Group

Booth No.
D.5

Copenhagen Merchants Group is a family-owned business founded in Denmark in 1977 as an agricultural commodity brokerage, today operating from seven broker offices.

From that foundation the group has grown incrementally across the value chain, adding dry bulk shipping and chartering, market intelligence, terminals and logistics, plant proteins and battery energy storage.

Copenhagen Merchants Group is a family-owned business founded in Denmark in 1977 as an agricultural commodity brokerage, today operating from seven broker offices. From that foundation the group has grown incrementally across the value chain, adding dry bulk shipping and chartering, digital market intelligence, terminals and logistics, plant proteins and battery energy storage.

That growth has always followed our clients rather than a plan drawn up in advance. Each new business started because customers asked us to solve the next problem in the chain, and the six companies in the group are designed to work together: a counterparty can source a cargo, charter the vessel, store and handle it, and price the whole chain with the same group. More than 300 colleagues of over 15 nationalities work across 18 offices and terminals worldwide.

De Jong Shipping Group

De Jong Shipping Group is a family-owned shipping and logistics company with more than 100 years of experience in inland and maritime transport.

From our roots in inland shipping, we have developed into a versatile logistics group active across European waterways, ports and sea routes. Today, our activities range from inland and push-barge transport to shortsea shipping, port agency services and integrated logistics solutions.

We operate through two established brands:

Rederij de Jong - our inland shipping division, specialising in push-barge transport and inland waterway logistics. With approximately 20 push boats and 200 barges, we operate one of the larger push-barge fleets in Western Europe.

C-Shipping & Logistics - our maritime division, providing shortsea and seagoing shipping solutions as well as port agency services.

In addition to our own activities, De Jong Shipping Group participates in several companies that complement our network and expertise, including **TransMatch**, further strengthening our position within the European transport and logistics chain.

Together, our companies combine their fleets, expertise and networks to provide flexible and reliable logistics solutions. From port to final destination.

One group. Owner and broker. Inland and sea. From port to destination.

Eurofins Food Testing Rotterdam (LabCo) B.V.

At Eurofins, we believe that insight into quality and food safety should not only reveal what can go wrong, but more importantly, what can be improved.

As the global leader in food, feed and supplement testing, Eurofins helps businesses transform analytical data into actionable insights. Through our worldwide network of more than 300 laboratories, we support customers in making smarter decisions, improving efficiency, managing risk and maintaining compliance across global supply chains.

From microbiology, contaminants and pesticides to authenticity, allergens, nutrition and regulatory compliance, our testing solutions are designed to do more than verify product safety. They help organizations continuously improve quality, optimize processes and strengthen their competitive position.

We see laboratory testing not as a goal, but as a tool to unlock valuable insights that drive better performance throughout the supply chain.

Fastmarkets

In today's constantly evolving agriculture commodity markets, continuous change is the new norm. Factors like severe weather, geopolitical tensions, domestic policies, biofuel demand, food security concerns and shifting trade flows keep impacting the market's daily reality, resulting in high price volatility.

Staying informed about the market's pulse and interpreting global supply and demand patterns or price signals has become more challenging yet crucial. Traditional methods like global price benchmarks are no longer sufficient. The market now relies on decentralized trade and agriculture price data, demanding an objective, locally immersed entity to provide more reliable information.

Fastmarkets is here to help you navigate this rapidly changing market. As a result of combining The Jacobsen, AgriCensus, EnergyCensus and Palm Oil Analytics, Fastmarkets Agriculture offers market-reflective price data, news and market intelligence.

With our comprehensive insights, we empower our customers to manage financial risk and gain a competitive edge in volatile markets.

GİTAŞ GIDA ve İHTİYAÇ MAD. TİC. SAN A.Ş

The Aydoğan family's commercial heritage dates back to the mid-19th century, with roots in transportation, trade, and agricultural supply. In the 1970s, the family relocated to Konya and acquired Gitaş Gıda ve İhtiyaç Maddeleri Ticaret Sanayi A.Ş., entering the wholesale food industry.

Since 1999, Gitaş has focused on international commodity trading, sourcing high-quality agricultural commodities and feed raw materials from major global markets, including South America and the Black Sea region. Its core product portfolio includes oilseeds, grains, pulses, and feed ingredients.

In 2004, Gitaş established a Full-Fat and DEES (Double Extruded Expanded Soybean) production facility, supplying high-energy and high-protein feed products to the Turkish market.

In 2007, the company commissioned a sunflower seed crushing facility in Konya with an annual capacity of 150,000 metric tons. Through guaranteed purchasing programs, this investment supported the growth of regional sunflower production and strengthened the local agricultural supply chain.

Today, Gitaş is a trusted partner in global commodity markets, combining a long-standing commercial heritage with international sourcing expertise and extensive experience in oilseeds, grains, pulses, and feed raw materials.

HAROPA PORT

Booth No.
C.37/39

The ports of Le Havre, Rouen and Paris form the n°1 port complex in France : HAROPA PORT.

As the fourth largest north-European port, it serves a vast hinterland whose core is in the Seine valley and the Paris region forming the biggest French consumer market area.

HAROPA PORT is also at the heart of the most productive cereals-growing regions of France. Each grain season there are around 8 Mt of cereals exported all over the world via the grain terminals in Rouen. On top of that, HAROPA PORT is hosting many agricultural products processing industries, making it one of the European leaders in this field.

The know-how of the port private operators, the reliability of the supply chain, the competitiveness of port operations and the availability of land bring lots of development opportunities to new businesses. Come and visit us at booth C37-C39 to share your projects with us.

İMİSK ITHALAT IHRACAT TIC. VE NAK. A.S.

International agricultural commodities trading and logistics
Founded in 1959, İMİSK is a Türkiye-based international agricultural commodities trading and logistics company. Its core portfolio includes cotton, grains, pulses and oilseeds, complemented by feed ingredients and sugar. Through its IMISK AGRO offices in Odesa, Ukraine, and Kostanay, Kazakhstan, the company works close to key producing regions and develops reliable origination and supply programmes for customers in Türkiye, Europe, the Middle East and Central Asia.

İMİSK is also active in importing grains, oilseeds and pulses into Türkiye.

İMİSK has warehousing capabilities in Uzbekistan to support import, export, transit and regional distribution. Together with its Kazakhstan operation, this infrastructure strengthens the company's ability to serve customers and develop trade flows across Central Asia.

Looking ahead, from the 2027 crop season İMİSK will also introduce organic grains, pulses and oilseeds to its portfolio.

The company's Hopa Port operation on Türkiye's Black Sea coast provides an important logistics advantage, with storage capacity exceeding 20,000 MT, vessel handling capacity of up to approximately 27,000 MT and loading/discharge capability of around 4,500 MT per day.

Supported by Logiswift, its logistics management software, İMİSK combines origin expertise, quality coordination, port infrastructure and international logistics to connect producers and buyers with efficient, market specific supply solutions.

Inerco Trade SA

Inerco Trade SA is the Swiss trading arm of KERNEL, the world`s leading producer and exporter of sunflower oil. Powered by KERNEL`s integrated Black Sea platform, we connect Ukraine to global demand across 60+ countries.

KERNEL`s scale spans four core segments: oilseeds crush, grain exports, infrastructure & logistics and farming.

This is underpinned by modern export terminals, crushing plants, rail assets, and inland storage in Ukraine.

Inerco translates this industrial footprint into market access and risk-managed solutions for buyers worldwide. We offer competitive pricing, quality assurance, and end-to-end logistics to ensure reliable execution.

Together, KERNEL and Inerco strengthen global food security by linking Black Sea farmers and crushers with international consumers: reliably, responsibly and at scale.

Ipek Agro

İpek Agro is an agricultural commodity trading company backed by the strong industry expertise, established business network, and operational capabilities of its group companies, Oba Makarna and İpek Yem. As a 100% subsidiary of İpek Agro, İpek Yem has been a leading company in the feed industry since 1988, bringing decades of sector experience, market knowledge, and strong relationships across the agricultural value chain. Together with the international experience and commercial capabilities of Oba Makarna, this strong group structure provides İpek Agro with a solid foundation for its trading operations.

With an annual trading volume of approximately 10 million tons, İpek Agro manages a diversified portfolio of key agricultural commodities, including corn, soybeans, soybean meal, wheat, barley, sunflower meal, and wheat bran. The company serves the Turkish market while also conducting international and transit trade, sourcing products from major origins and delivering them directly to customers across different markets.

Through its strong global trading network, efficient supply chain capabilities, and solution-oriented approach, İpek Agro connects producers, suppliers, and customers across geographies, creating value throughout the agricultural commodity supply chain. The company is focused on developing long-term, reliable, and sustainable partnerships while continuously expanding its international reach and strengthening its position in global agricultural commodity markets.

J MÜLLER Group

Booth No.
B.27

The J. MÜLLER Group is a sixth-generation family-owned company founded in 1821 in Brake, Germany. The company specializes in seaport terminal operations and port services in Northern Germany, with a focus on the Lower Weser region and sites in Brake and Bremen. At its Brake site, J. MÜLLER operates the largest contiguous silo complex in Europe, providing extensive infrastructure for the handling, storage and processing of agricultural commodities and breakbulk cargo.

In Bremen, J. MÜLLER is a long-standing partner of the coffee industry and has extensive expertise in grain handling, including the operation of the Getreideverkehrsanlage (GVA) since 2017.

Coffee handling and transshipment are key areas of operations, complemented by the handling of maritime proteins such as fishmeal and krill meal.

Both terminals are located close to Germany's largest compound feed production region. The handling of a wide range of agricultural commodities and feed ingredients creates opportunities to combine cargo flows and re-exports, for example for the aquaculture industry.

The J. MÜLLER Group offers a broad range of logistics services, including forwarding, chartering, ship agency and logistics. These activities are supported by an inland shipping fleet and joint ventures such as J. Müller Chartering, B-LOG and Müller & Oorburg Logistics.

The Group employs around 550 people across Brake and Bremen.

Peterson and Control Union

Booth No.
D.3

From commodities to confidence.
Across the entire supply chain.
Our story began in Rotterdam in 1920, built on hands-on expertise, an eye for quality and a deep understanding of commodity logistics. More than a century later, the world of commodities has changed dramatically, but our commitment to being close to the product and close to our customers has not.

Today, Peterson and Control Union combine deep commodity knowledge with an international network, supporting customers throughout their supply chain.

From dry bulk carriers and inland barges to terminals and storage facilities, our specialists are there when and where their expertise matters most. We coordinate commodity logistics and inland shipping, supervise loading and discharge, perform independent inspections, determine weight and quality, take representative samples and provide independent laboratory analyses.

Our laboratories support the food and feed industry with a broad range of analytical services, while our experienced surveyors act as independent eyes and ears on the ground. Together, we provide the reliable information and practical support our customers need to keep commodities moving and make confident decisions.

Because an inspection, shipment or analysis is always part of a bigger journey. Across the supply chain, our specialists provide the expertise customers need, from hands-on logistics support to independent inspection and laboratory services. Each service has its own distinct role, while together they provide the insight and support needed to keep commodities moving efficiently and make informed decisions.

Whatever the commodity. Wherever it moves. Expertise you can count on.

Meet Peterson and Control Union in Rotterdam and discover what our expertise can do for your supply chain.

PORT OF RAVENNA AUTHORITY

Booth No.
C.18

The Port of Ravenna is a multipurpose port and an intermodal platform offering high value-added logistics services, equipped with port terminals with direct connections to the road and motorway network and to the national railway network.

Due to its strategic geographic position it serves Northern Italy and Central Europe and is a key port for the Eastern Mediterranean and Black Sea markets. It also plays an important role in trade with markets in the Middle East and Far East. Its inclusion in the comprehensive road system and its connection with the most important transport networks makes the Port of Ravenna an accessible hub from the main Italian and European markets, indeed it is included among the Core Ports of the TEN-T networks, and is part of both the Baltic-Adriatic Corridor.

Relevant investment and projects are following the path of a greener, sustainable, smart and digitalized port.

Port of Rotterdam

The Port of Rotterdam creates significant economic and social value in the Rotterdam-Rijnmond region, the Netherlands and Europe through employment and security of supply of energy, food and other products needed in society. Thanks to the favourable location, excellent infrastructure and hinterland connections, the port serves as an important hub for industry and global trade.

The Port of Rotterdam Authority's core tasks are the sustainable development, management and operation of the port and industrial complex and maintaining the effective, safe and efficient handling of shipping in the port and the offshore approaches to the port. The aim of the Port of Rotterdam Authority is to strengthen the port's position as a future-proof logistics hub and industrial complex. Quality is central to this. The Port Authority's ambition is to develop a climate-neutral port that is in harmony with its surroundings.

Established in 1933, the Rotterdam **Port Promotion Council (RPPC)** is an independent business network representing approximately 275 companies from Rotterdam, Moerdijk, Dordrecht and surrounding regions. Through international promotion, participation in trade fairs and targeted business networking, RPPC connects port-related companies with potential customers and strategic partners worldwide.

Feeding Europe through Amsterdam

Growing together through connectivity

Port of Amsterdam is one of Europe's leading gateways for agribulk. Every year, millions of tonnes of grains, oilseeds, feed ingredients and biomass flow through our port to markets across Europe.

Companies choose Amsterdam for its deep-water access, strategic location, multimodal connections and strong logistics ecosystem. Together with our partners, we continue to invest in efficiency, sustainability and resilient supply chains. For generations, agribulk has been a cornerstone of Port of Amsterdam. Today, the port is home to leading international traders, processors and logistics companies, making it one of Europe's most important agribulk hubs.

A powerful ecosystem where commodities, processing and logistics come together.

Soufflet Negoce By InVivo

International Grain Trading
The International Grain Trading division of the InVivo group, Soufflet Négoce by InVivo, is a major European player in the grain trade, handling the origination, transport and export of cereals and oilseeds to Europe, North Africa, Africa and Middle East.

International trade in cereals and oilseeds
Origination and storage: cereals, oilseeds and protein crops
Trading: origination, transport and export
Clients: Importers and industrial customers

Soufflet Négoce by InVivo sells wheat, barley, corn and oilseeds, primarily from France as a key partner in managing the supply chain from producers to consumers.

Strategic orientations
1. Consolidate its leadership in the export of French cereals in a very volatile and uncertain geopolitical context.
2. Maintain and expand its client portfolio and reach a critical size to further increase business resilience in the long term.
3. Identify niche markets and diversify its product offer in order to adapt to changing client expectations over time.

Grafite by InVivo
Grafite adds value to low-carbon raw materials in France and Europe, connecting agro-industrial players with producers.

Tampieri SpA

Booth No.
B.39

Tampieri produces non-packed vegetable oils and meals for animal consumption.
In detail:

- crude and refined oil from sunflower, sunflower high oleic, corn germ, grape seed and rapeseed;
- sunflower, corn germ and rapeseed protein meals.

Supplies are via tanker trucks, trains and ships.

We will be present as a supply chain partner, ready to share visions, trends, solutions and build new synergies.

Every drop of our oil tells a story of commitment: quality, sustainability, excellence.

Principles that are reflected in every industrial choice, in the use of renewable energy and in our investments.

Come and visit us to talk about markets, logistics, sustainability and innovation.
Because for us, the future is built together.

The DeLong Co., Inc.

The DeLong Co., Inc. is a sixth generation family owned agricultural business headquartered in Clinton, Wisconsin, and the largest containerized grain exporter in the United States. Founded in 1913, DeLong operates across five divisions covering grain, seed, agronomy, wholesale distribution and transportation, with facilities across the US Midwest and dedicated container loading operations serving major rail and port gateways.

DeLong exports corn, soybeans, wheat, DDGS, feed ingredients and identity preserved and Non GMO products to buyers throughout Asia, the Middle East, Africa, Europe and the Americas. The company combines origination with in house logistics and container trans-loading to deliver consistent quality, full traceability and reliable execution from the US interior to destination. DeLong also owns and operates the Agricultural Maritime Export Facility at Port Milwaukee, a dedicated bulk terminal on Lake Michigan able to reach export markets via the Great Lakes St. Lawrence Seaway handling DDGS and other agricultural products.

U.S. Soybean Export Council (USSEC)

The U.S. Soybean Export Council (USSEC) champions U.S. Soy worldwide. Through innovation, sustainability and partnerships, USSEC connects farmers to global markets. Its members represent the soy supply chain, including U.S. Soy farmers, processors, commodity shippers, merchandisers, allied agribusinesses and agricultural organizations.

Europe is a key regional market for U.S. whole soybean and soybean meal exports. The reliability of U.S. Soy export shipments and the industry's work in sustainability support its competitive position in Europe's food and feed sectors. U.S. Soy has been collaborating with markets in Europe since 1960, and USSEC works closely with the European Feed Manufacturers' Federation (FEFAC) on sustainability in the European feed industry.

U.S. Wheat Associates

Booth No.
C.16

U.S. Wheat Associates (USW) is the export market development organization for the U.S. wheat industry. Representing U.S. wheat growers, USW works closely with millers, bakers, food manufacturers, and grain traders around the world to promote the value, quality, and reliability of U.S. wheat.

From the Rotterdam office, USW supports customers across Europe, the Middle East, and North Africa by providing market intelligence, technical expertise, educational programs, and customer support. Through collaboration across the supply chain, USW helps customers understand the unique functionality and quality characteristics of the six U.S. wheat classes, enabling informed purchasing decisions and optimal product performance.

U.S. Wheat Associates is committed to fostering long-term partnerships, advancing industry knowledge, and supporting innovation throughout the global wheat, flour, and baking sectors. By connecting international customers with the U.S. wheat industry, USW contributes to a dependable and sustainable global grain supply chain.

Van de Graaf & Meeusen Rivertransport B.V.

Van de Graaf & Meeusen is a forward-thinking family-owned company that has been active in inland and push-tow shipping since the days of the traditional skippers' exchange.

With decades of experience and a continued commitment to investing in inland shipping, we have built a strong combination of a push-tow shipping company with approximately 50 barges and 12 push boats, alongside a professional chartering division. Both divisions complement each other perfectly.

We believe in collaboration and actively seek to build strong partnerships with skippers, entrepreneurs, fellow industry professionals, clients, shippers, receivers and other stake-holders. By combining knowledge, experience and an extensive network, we strive to create an integrated approach that delivers the best possible solution for all parties involved.

Vista GmbH

Vista Geowissenschaftliche Fernerkundung GmbH, founded in Munich in 1995, develops Earth Observation-based digital solutions for sustainable management of the Water Energy Food Nexus. The company's philosophy is to reduce the global footprint of agriculture and support sustainable, climate-resilient food production.

Vista combines optical and radar satellite data with scientific models, machine learning and AI to create a Digital Twin that represent and predict agricultural and environmental processes.

This Digital Twin powered approach forms the core of Vista's work and supports applications such as smart farming, yield forecasting, irrigation and nutrient management, carbon farming and agricultural monitoring.

Vista's solutions are used by customers and partners in more than 25 countries, including international and national institutions as well as companies from the agricultural and insurance sectors.

VV COM

Since the early 1990s, VV COM has been active as an intermediary in the global commodities trade, with a particular specialization in grain. We have an experienced international team, an extensive network and distinguish ourselves through personal attention, efficiency, reliability and expertise.

The international commodities market is constantly evolving and influenced by a wide range of factors that can affect both price and quality. Our challenge is to support our clients in navigating this dynamic environment. As an intermediary, we help them make the right choices, tailored precisely to their buying and selling needs.

That is why our team looks beyond current market conditions. We closely monitor future trends and developments, ensuring that we remain well informed and can provide our clients with the knowledge and support they need to make well-considered decisions.
